New Election Laws Bestieting Stiff are Commended to the Southern States, as a Remedy for Negro Bule.

Tolodo, Ohio, Biade.

The political revolution which has placed the national executive and congress in the hands of the Republican party has suddenly brought the Southern ques tion to the front in national affairs. This is largely because the Southern press has begun agitat ug the matter. The discussions in the pape :s of that section are not as to the processe policy of the new ad-ministration as a whole, but "what will

it do to the South!" To any unblased observer, such a discussion is the height of absurdity. There is but one auswer to the question put by the Southern press, and it is this: The Republican administration will know n sectionslism. The policy it will pursua-toward Mississippi, or Geergia, or South Carolina, will be identical with its policy toward Onlo, and Inwa, and New York. It will be the same for all the states. No state will be favored, and no state will be

What would be thought of the press of this state, for instance, were it to soberly ask the question what the policy of Har-rison's administration will be toward suppose that there will be any attempt to usurp the latter with regard to any Southern state than there is fear of the same thing in any Northers, or Eastern, or Western state. It will be a national administration. It will treat every state the same as every other state. Its rule of action within the well defined limits of its power will be the same all over the Union. The United States is a nation, and no member of it has any rights or privileges not shared by every other.
What is the "Southern question,"

Simply the fact that the whites fear the supremacy of the negro politically. Herce the practical suppression of the colored vote, which is ackno wiedged by Son :-ern Democrats themselves. The pinin fact seems to be that the negroes are in a condition of moral duress. In very many sections the mass of them do not attempt to vote. They find, all things considered, that they get along better with their white neighbors by ignoring their own right to the ballot. This moral restraint is supsome states by a waite supervision of the count of ballots, which effectually pre-cludes the possibility of the negroes, where they are in a majority, obtaining

Now all this has the result of practically nullifying the fifteenth amendment to the constitution of the United States, which provides as follows:

Section 1. The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any state on account of race, color or previous conditions of servitude. The congress shall have power

to enforce this article by appropriate legislation.

The disgalet of our Southern brother, then stated plainly, is simply the uneasi ness of the violator of law, when a new to interfere with his violation.

That is the legal aspect of the case. Now let us look at it from the Southern few years ago were in rebellion have now open the optic nerve sheath, and thus a majority of colored voters, and in all not only to relieve the nerve from present the colored men.

by demagogues, by thieves, by incompetreasuries would become the pray of rascals who could control the colored vote, taxation would be enormously increased, the revenue be squandered, and the progress of the commonwealths under such

To this is added a natural repugnance To this is added a natural repugnance which the sheath could be exposed to being ruled by what is regarded as an inferior race, one from which the stigms of servitude is not yet removed. The of servitude is not yet removed. The every step of the process. He read before ples is that self-preservation is the high-

a necessity.

There is a basis of truth in all this. We are not disposed in the least to underestimate the grave difficulties of the situation in the South. The supremacy of an ignorant voting majority, led by selfseeking demagogues, is a calamity any-where, North or South, East or West.

for years controlled the house of repre-sentatives, and which in 1881 obtained which it is now habitually or frequently central of the presidency itself.

The whites are in full control of all these states. Let them use the power they have in the enactment of new election laws, restricting the suffrage. This cannot be done "because of race, color, r previous condition of servitude," but It can be done so as to exclude the ignorant masses from voting, whether they be white or black. Then see that every man entitled to vote under that law has a free ballot and an b nest count. Or, if this is not advisable, I t the Southern congress men unite in an amendment to the federal constitution the the South will observe, to take the place of the nullifiled fifteenth enendment, and orge its passage by con-gress and its ad. ption by the states

meet with a candid and hearty response Leyden from the seige, October 3, 1575, item the Republican party of the North was kept as a religious festival of thanksto m the Republican party of the North was kept as a religious festival of thanks. The same Let them dismiss forever all fears of giving and praise. In the English church druggists se

havonet rule, or a return to the miseries of carpet-ong government. The new administration will not resort to measures shown to be impracticable. They will find in the end, that President Harrison is not their enemy, and that any solution they may propose for the present order of thinge, which is impracticable of further continuance, will be considered with a due regard for the complexity of the prob lem and the magnitude of the interests involved.

Lat the South take the inistive. She is doing political injustice to the remainder of the Union. Let her take steps to change this policy and the internal affairs of the Southern states will not be meddled with by the admicistration.

A WOMAN MURDERED.

She Starts Out to Gat Married and Is Found In a Dring Condition.

CHICAGO, ILL, Nov Saturday levening a powoman, plainly dressed, lying in a pool of blend on the pavement of the Grand boulevard, Rear

Forty hird street. She was taken to the nospital, where a ghastly wound was discovered on the back of her head. The woman was unconectous and died shortly afterward. The police have identified her as Eva Mitchell, aged nineteen. She came here from Washington, Iowa, a x months ago. An important clue has been obtained from the falman at Forti-eth street who claims an intimate acquaintance with her. He says the girl Ohio? The limitations of federal power, called Saturday evening at his shanty to and of the reserved rights of the sta ca, are bid him good bye, saying she was going well known. There is no more reason to to get married. She was in a buggy driven by a young man whom the flagman thinks he could identify. The police have not yet found any trace of the young man.

The Hyde Park police arrested two men on suspicion of connection with the

murder. The authorities refuse to make their names public at present.

Soon after the first two men were arre ted two others swere captured as browing something of the crime. The men's names are given as Thomas Matterson, N.O. Gisy, Robert Lavton and H. A. Howell. The Hyde Park police refused to say which one of the men is supposed to have killed the girl.

MODERN SURGERY.

A New Operation for Restoring Sight De acribed - A New triumph. London Hospital.

Among the matters of interest which were brought before the British Medical ical Association at the recent Glasgow plemented by election laws framed to meeting was an account of Mr. Bradnell make it difficult for them to vote, and in Carter of a method which he had devised for opening the sheath of the optic nerve behind the eye for the relief of pressure within the cavity of the skull. The brain is invested by firm membranes, which secrete a certain amount of fluid, and are continued down to the eye in the form of a sheath which surrounds the optic nerve; and whenever the pressure within the cavity of the skull is increased, as by the growth of brain-tumor, or even by excess of secretion from the membranes themselves, a super-abundance of fluid is apt to find its way down the nerve-sheath to the level of the eye, to subject the optic nerve to irjurious pressure, and in many cases to destroy the sight

It not infrequently happens that the pressure within the brain cavity may be executive, one who is not believed to feel which, nevertheless, continue in action disposed to shield him, steps into power instead of an official who is not disposed blindness, even a though the patient may be seen as though the patient may be seen as the s increased by temporary or curable causes, in other respects recover In view of these conditions it was suggested by Dr. de Wecker, of Paris, sixteen or seventeen standpoint. Several of the states which a years ago, that it might be possible to few years ago were in rebellion have now open the optic nerve sheath, and thus the negro vote is very large, and its pro-portion is continually increasing—because the colored population increases more eye relatively to the brain cavity, to drain rapidly than the white. An absolutely the latter by gravitation, and to relieve free ballot, with elections wherein every the brain as well as the eye. Dr. de citizen, white or black, is as free as he is Wecker made two endeavors to accomplish in Ohio to vote as he chooses, and where this object; but he tried to feel his way the votes are honestly counted and returned, would mean negro domination
The local offices—city, county and state
—would be filled by the candidates of knife, capable of being projected by The contention of our Southern breth-ren is, that such domination would be un-bearable—that the critics would be filled that he only attempted his operation n means of a spring. The risks of fellure, tents; that the state, county and city one attempt to follow his example has been recorded.

Mr. Carter's attention was called to the

matter last year by a case in which the

diminution of pressure within the optic nerve-sheath was manifestly desirable; and he devised a method of operating by est law, and that control by the whites is an account of the first case in which he operated, which was successful; and he read an account of three more cases at Glasgow, in one of which the result was negative as far as sight was concerned, while in the other two the patients were not only quickly restored to useful vision -in one lustance from complete, in the other from neuly complete, blindness-But we contend that the methods on twee also relieved or cured of other symptoms, such as headsche and sickness, arising from direct pressure on the brain In his paper at Gasgow, Mr. Carter which employ them a political power in the senate and house of representatives to claimed for the new operation that it which it is not entitled. It has resulted could be performed with certainty, and in a political combination between the without risk either to life or any impor-white Democrate in the South and the tant structure, and that it afforded a Democratic party in the North, which has reasonable prospect of the preservation The method is wrong and must be abandoned.
